MAYO CLINIC

Executive Health Program

The examination usually involves two sessions, although the 2nd session can be accommodated by phone. The first session usually lasts about 3 hours and includes:

- An interview, review of medical history and full examination all by our EHP physicians.
- Comprehensive laboratory tests including state of the art coronary risk factor markers.
- Cardiac treadmill stress test if indicated/appropriate radiology exams as indicated.
- Lung function, vision and hearing evaluations. Body composition analysis by DXA technology.

The second session involves a private (phone or office) consultation with the examining physician to review all test results. This meeting usually lasts 45 minutes to one hour.

In addition, a thorough summary letter with recommendations, including copies of all results is sent to each patient. Referrals to specialists for additional procedures or consultations are happily arranged by our EHP staff. Findings may be forwarded to the patient's private physician with the signed consent of the patient. Upon completion, we return the patient to his/her care with recommendations for follow-ups as necessary. In the absence of a primary care physician or at the individual's request, we can make referrals to carefully selected internists or specialists.

Baseline physical - \$4000

W/colonoscopy - \$7500-\$8000

CENTER FOR PARTNERSHIP MEDICINE AT NORTHWESTERN HOSPITAL

Includes labs, stress test, exercise physiology consult, hearing and eye exam

CEDARS SINAI

ASIC EXECUTIVE HEALTH EVALUATION

This evaluation emphasizes the early detection of health problems, as well as health maintenance.

The Components:

- Comprehensive physical examination including a detailed review of family and medical history
- Imaging tests, including chest X-ray, cardiac CT scan, and full Abdominal Ultrasound - to detect early signs or increased risks of cancer, coronary artery risk, abdominal aortic aneurysm or stroke
- Electrocardiogram (EKG) - determines a baseline for cardiac risk
- Pulmonary function test - analyzing lung capacity to check for early signs of emphysema or other lung conditions
- Prostate exam and PSA screening for men - for detecting early-stage prostate cancer
- Pelvic and Pap test for women - checking for early signs of cervical cancer
- Mammogram for women - screening for early breast cancer as age appropriate
- Lab tests to screen for blood count abnormalities, cholesterol levels, liver, kidney, and thyroid functions, cardiovascular risks, and prostate, colon and rectal diseases. Include but not limited to Complete Blood Count (CBC), comprehensive cholesterol panel, Comprehensive Metabolic Panel (CMP), fecal occult blood testing, highly-sensitive C-reactive protein (CRP), thyroid (TSH), and urinalysis (UA)
- Hearing test - identifying signs of hearing impairment

Cost: Basic male - \$2400, female - \$2700 (inc. mammogram)

Comprehensive male -- \$3800 (inc. vaccinations for travel, bone density test, carotid U/S) female -- \$4200

Colonoscopy - + \$1800

CLEVELAND CLINIC

Cleveland Clinic Executive Health Physical Examinations are tailored to meet your needs. This comprehensive evaluation may include the following, but is customized for you.

- A detailed history and physical examination to assess your overall physical health.
- Comprehensive laboratory tests including a complete blood count, cholesterol and lipid profile, urinalysis and blood chemistries and a check of Vitamin D, Vitamin B12 and iron levels.
- A complete cardiac health evaluation including resting electrocardiogram (EKG), a cardiac stress test and BpTru™ blood pressure readings.
- A visual health evaluation including a visual acuity test, tonometry, refractive services and Fundus photography, which reveals abnormalities that threaten vision.
- An auditory health evaluation that assesses your hearing along with recommendations for hearing preservation or hearing amplification.
- A pulmonary health evaluation that includes a chest x-ray and spirometry, a test of breathing function that helps detect emphysema, bronchitis, asthma and other airway problems.
- A complete series of adult vaccinations, reviewed and administered as needed.
- A bone densitometry test to determine your risk of bone fractures.
- A weight, fitness and stress evaluation including nutrition consult and body composition test, a fitness consultation and personal and executive coaching.

Starting at \$3000

JOHNS HOPKINS

A typical Executive Health visit may consist of the following services:

- Comprehensive Medical History and Physical Examination
- Laboratory Screening Tests
- Hemoccult Test
- Urinalysis
- Electrocardiogram (EKG)
- Chest X-ray
- Audiogram
- Pulmonary Function Testing
- Eye Evaluation at the Wilmer Eye Institute
- Nutrition Counseling
- Personal Representative for the day, continental breakfast, hosted lunch, and parking

Additional elective services that are available if clinically indicated might include:

- Exercise Stress Electrocardiogram Test
- Metabolic Stress Test
- Exercise Counseling
- Dermatology skin cancer screening
- Colonoscopy (must typically be scheduled on an additional day of service)

For Women

- Gynecology examination (with Pap smear)
- Breast Imaging
- Bone Density Study

Pricing

The Executive Health visit is personalized for each individual patient. As such, the exact total cost for services cannot be determined in advance. Additional testing or procedures may be requested by the patient upon scheduling or recommended by the physician on the day of service.

Approximate: Executive Health Physical + Colonoscopy + Exercise Stress Test = \$3650 (Basic physical = \$2100, Colonoscopy = \$1300, Exercise Stress Test = \$250)

DUKE EXECUTIVE HEALTH PROGRAM

Beginning in July 2011 clients of the Duke Executive Health Program will have the following added enhancements:

- BioSignia Health Risk Assessment Tool - uses medical technology to accurately predict your future health profile. This data will be instrumental in the development of your risk assessment and disease prevention programs.
- Vitamin D screening is now included in the collection of diagnostic tests offered to all new patients
- Returning patients now benefit from:
 - A Nutritional Consultation Review with our Registered Dietician
 - BioSignia Health Risk Assessment Tool
 - Ongoing Health and Lifestyle follow up by our Exercise Physiologist and Integrative Coach

Patients who are Corporately Sponsored

New Patient \$3,790

Return Patient \$2,100

Patients who are not Corporately Sponsored

New Patient Program Fee \$2,900

Return Patient Program Fee \$1,540

(prices don't include colonoscopy)

Note that labs and studies will be filed individually with a patient's insurance provider. Please see the Insurance Information section for more details. In the event a patient chooses not have any services filed with their insurance, the package cost would be the same as the corporately sponsored rate of \$3,790 for new patients and \$2100 for return.
